Mr. Gary Baughman
Hazardous Waste Facilities Unit Leader
Colorado Department of Health
4210 East 11th Avenue
Denver, Colorado 80220

Gentlemen:

Enclosed are two (2) copies of the draft Historical Release Report (HRR) identifying and describing Potential Areas of Concern (PACs) from outside releases of contaminants. A few areas of the draft report have already been identified for correction in the final. First, some dates, i.e., 01/01/01 or 12/31/99, used in Appendix A, References, will either be changed to the correct date or will be footnoted. For example, "01/01/01" represents a timeframe early in the plant history, and 12/31/99 represents a more recent timeframe in the plant's history. Second, the PCB spill report entitled "Assessment of Potential Environmental Releases of Polychlorinated Biphenyls (PCB), Preliminary Assessment/Site Description" submitted on October 4, 1991, is not referenced in Appendix A, References, because a 7-digit code had not yet been assigned to the document. The PCB report is however referenced in individual PAC descriptions. The PCB report will be incorporated into Appendix A of the HRR for the final document.

Any questions should be referred to Rich Schassburger on 966-4888.

Sincerely,

David P. Simonson
Assistant Manager
for Environmental Management
